Nathaniel Medrano

Full Stack Developer

Full Stack developer with a well-rounded experience in LAMP stack development. My focus lies in challenging projects that will sharpen my skills and hone in my drive to create applications that people will love to use. I consistently aim to gain a solid understanding of a project's requirements and what functionality the end user needs to create a well polished and scalable application.

Experience

2017-05 - present

Freelance Full Stack Developer

Nathaniel-David Web Development

Housing Authority of the City of Austin - Consulting and development contract to create a custom platform that optimizes the reporting, tracking, and processing performance of all four departments within the organization.
- Responsibilities: Consulting, wire-framing, design, database schema, and development
- Project Specs: Laravel 5.5, VueJS, MySQL/SQL Server Databases, Active Directory

Ascension Dental Partners - Created multiple custom platforms for both internal and customer use. Projects included a reporting site for both admin and dental providers, custom Wordpress checkouts for membermouse products, and a multi-tenant platform for dental providers that included registration, customization of fee schedules, branding, checkout, and a Member/Admin dashboard.
- Responsibilities: Wire-framing, design, database schema, server configuration/migration, development, and launch
- Project Specs: Laravel 5.1 & 5.4, Wordpress, Membermouse, remote MySQL DBs, Ubuntu servers, Stripe Checkout

Charmed Labs (pixycam.com) - Wordpress site for product information/documentation and full migration of RedMine forum to Discourse platform
- Responsibilities: Server configuration, db migration, Wordpress setup, and DocuWiki installation
- Project Specs: Ubuntu 16.04, custom Ruby database migration script, Wordpress, and Discourse

2016-03 - 2017-05

Full Stack Developer

SixPack Shortcuts

Overview - Contributed to the member site functionality for AWS push notifications, product tracking, and admin reporting. Was the primary developer for Affiliate management, Sales Funnels, and split testing.
- Responsibilities - Collaborate with marketing and affiliate management teams; create sales funnels and split tests; create new products (SalesForce/Shopify/Database/Landing Page);
- Project Specs - Laravel 4, Shopify, AWS, Salesforce Products, Has Offers, Maripost, and Stripe

2014-10 - 2016-03

Web Developer

Sage Environmental Consulting

Built custom web apps for internal and marketing use with Laravel, AngularJS, and WordPress. Handled tickets from clients and department heads to update sites and keep projects up to date. Projects included:
- SageAquaticLab.com - Content site for the Oklahoma Aquatic Laboratory. Bootstrap site that allows for web and mobile optimization
- ArchiveManager DB Lookup - Laravel App that runs email queries for marketing to retrieve and filter information that directly helps with revenue for the annual 4C Marketplace conference

Education

2014-02 - 2014-04

Codeup

Enhanced my knowledge of LAMP Stack as well as html/css and JavaScript. Projects included use of Phone Gap, Angular JS, JQuery, as well as MVC Frameworks such as Laravel and Ionic.
